

# NSM Remote Control Basic Version

This Infra-Red (IR) remote control is a brand new, aftermarket replacement control to suit all NSM ES4, ES5 and ES5.1 Jukeboxes.

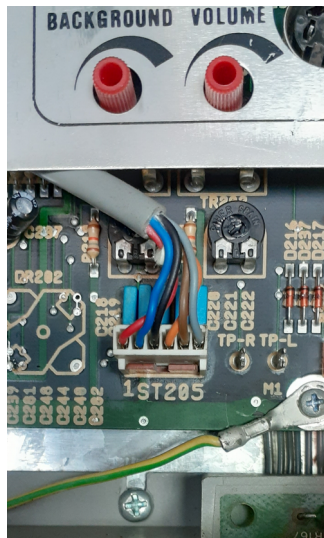

The Basic version (pictured) is designed specifically for use by Jukebox operators. It offers only basic functionality making it suitable for commercial settings ensuring confusion-free operation by venue staff.

With its tough design and robust ABS enclosure construction, this remote can withstand rough treatment received at any venue.

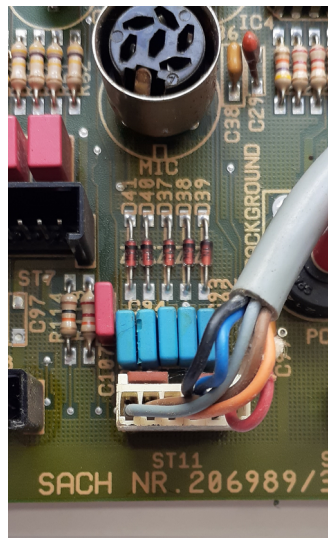

For the remote control to operate, the remote receiver module must be connected to the central unit control board shown below.

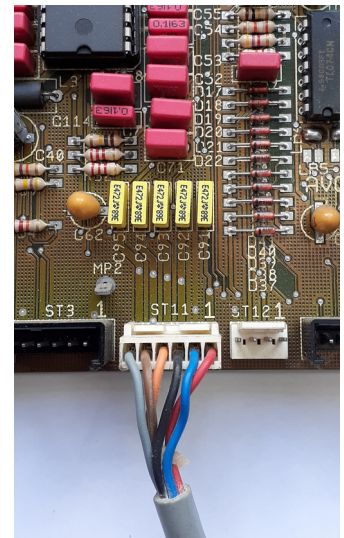

ES4 Receiver  
(The same receiver is used for ES4 – ES5.1)

ES4  
Receiver Connection

ES5  
Receiver Connection

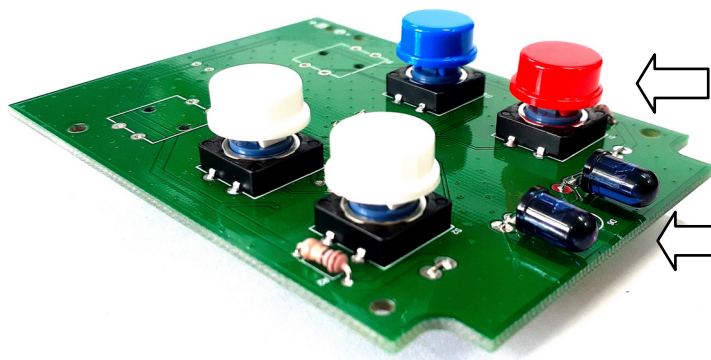

ES5.1  
Receiver Connection

Refer to your Jukebox manual for more information
